## Hr Manager

-Founder ScriptOne  
-Worked at WebBrain  
academy, Digital One  
company

Dear hr manager,

I am thrilled to have this chance to apply for the position of Frontend developer with IT company. I have enjoyed learning many new ideas and practices along the way in my long career as a Frontend developer, and I believe that I can contribute significantly to your project and goals by implementing sound IT principles.

In my previous position as the frontend developer of DigitalOne company. I had great opportunities to work with senior Frontend, Backend as well as Web designers in order to gain important experiences as web developer. I believed, I did my best to get useful experiences from senior programmers.

Also, I am good at teaching. I have worked at Webbrain Academy and taught over 50 students. 70% of them are working at different companies in Korea, the USA and Uzbekistan. Now I am founder of ScriptOne academy, online IT course including Javascript, Reactjs, Github, and Internship project that helps students to find the right path and go into job.

Best Regards,

**Fozilkhon Buzrukxojayev**
